TERRAQUEST

## What we offer

### Innovative approach to land referencing

Continuous development of automated processes to replace manual tasks and procedures.

### Comprehensive Service

Bespoke solution to each phase of the consenting process from site access to the acquisition of land.

### Market Intelligence

Access to 95% of planning applications in England & Wales can provide early notification of proposed developments thus mitigating potential risk to corporate assets.

### Best Practice in land information management to support CPO

Collaborative approach to managing financial risk through real-time reporting from the property cost estimate based on accurate land referencing data.

### Ongoing development of land referencing platform

Driven to capitalise on new opportunities arising through the availability of new data sources and technology to support core business activities and develop links to complementary solutions supporting the land acquisition process

### Collaboration through appropriate use of technology

Using web services to deliver key information and key outputs to project Stakeholders from one central source.

## Delivering to all market sectors

Approaching our 50th Anniversary TerraQuest is the UK's oldest and most experienced Land Referencing and Planning Services company.

A reputation built on collaboration, innovation, best practise and its people.

TerraQuest is an Ordnance Survey business partner, is G-Cloud accredited and custodian of the national Planning Portal since 2015.
